

## Anesthesiologist was warm and comforting

The anesthesiologist did a great job!! I had previously had nausea issues post-surgery and she was aware of that and said she would be sure to give me meds to help me. This time I had nothing! THANK YOU!

Impressed with the friendly, courteous and professional care.

The anesthesiologist was awesome. He was funny and compassionate

The staff was courteous and helpful. They were caring towards my needs and were professional. 5 Stars for Lakeview Surgical Center! Thank-You

I had the best experience with Lakeview. From checking in to surgery and recovery, everyone was amazing. So friendly and I can't say enough good things about my experience. Hopefully I won't be back, but if so, you would be my first choice!

Your staff is awesome. this was my 10th visit and every time the staff there is a 20 on a scale of 1 to 10. Love the card that comes in the mail. Thanks.

The professionalism and obvious competence of the staff and medical team.

It's very clean and everyone is so friendly and extremely helpful.

Surgeons and nurses were caring, confident, empathetic!

The staff was very friendly and competent.

The staff was very friendly and welcoming. I felt less nervous as this was my first surgery.

The staff is very good at guiding you through the process and making you feel as comfortable as you can, despite your nerves. I haven't had many surgeries and had some anxiety. I appreciated their clear instructions and their sense of humor as we worked our way through the day.

The nurses were my favorite. Every nurse I had was very kind and very nice to me.

My nurses were wonderful and the anesthesia provider was informative even though I'm a Surgery nurse they didn't treat me any different than any other patients.

Every person I encountered was cheerful, helpful and seemed very compassionate. This is a very professional organization who obviously is concerned with the mental health and comfort of their patients and not just the physical health and comfort. I was once again completely impressed and can't recommend this facility highly enough.

This was my third surgery there and everyone is always top notch and very kind and friendly.

The staff who admitted our daughter for surgery were so sweet and caring when speaking to her. They gave a wrist band to her stuffed animal and calmed her fears a little bit.

Absolute wonderful group of people working there!

The professional manner of all staff. The atmosphere of competence and care in my treatment.
